

# JBI System for the Unified Management, Assessment and Review of Information (SUMARI)

Go to <https://www.jbisumari.org/>

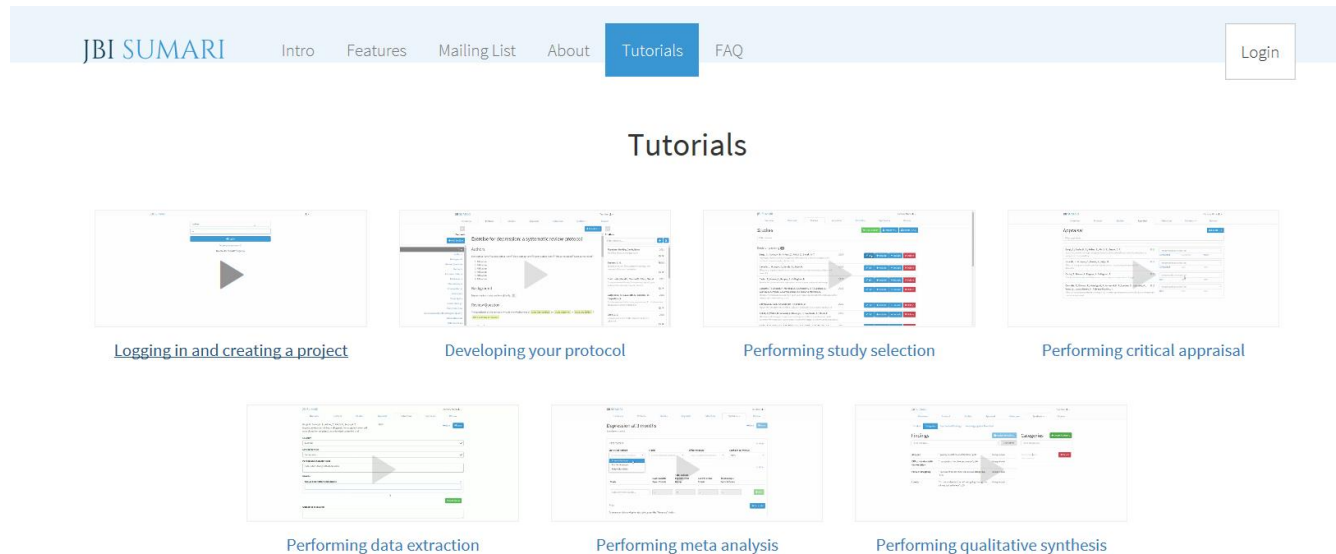

The System for the Unified Management, Assessment and Review of Information (SUMARI) is the Joanna Briggs Institute's premier software for the systematic review of literature.

It is designed to assist researchers and practitioners in fields such as health, social sciences and humanities to conduct systematic reviews. SUMARI supports 10 review types, including reviews of effectiveness, qualitative research, economic evaluations, prevalence/incidence, aetiology/risk, mixed methods, umbrella/overviews, text/opinion, diagnostic test accuracy and scoping reviews. It facilitates the entire review process, from protocol development, team management, study selection, critical appraisal, data extraction, data synthesis and writing your systematic review report. Essentially, it is a word processor, reference management program, statistical and qualitative data analysis program all in one easy to use web application.

## Clicking on Tutorial will take you to the following page:

Select which (or watch them all!) tutorials to view:

- Logging in and creating a project
- Developing your protocol
- Performing study selection
- Performing critical appraisal
- Performing data extraction
- Performing meta-analysis
- Performing qualitative synthesis

(and more being developed...)
